

Alexandre Carnero Pérez

AI Engineer — LLM Systems — Automation

Ferrol, Galicia, Spain
alexandrecarnerop@gmail.com
in alexandre-carnero-perez

AI Engineer with hands-on experience building LLM systems, multi-agent workflows, and automation solutions. Proven track record in developing AI products, integrating APIs, and deploying scalable backend architectures. Strong focus on real-world execution and entrepreneurship.

Work Experience

- Mar 2026–Present **AI Intern**, Tesla Technologies
- Developing AI and cybersecurity solutions with machine learning models for threat detection and risk analysis.
 - Contributing to LLM agent systems using LangGraph and multi-agent architectures.
- 2025–2026 **AI Agent Engineer**, NovaTech
- Built AI-powered applications using LLMs and multi-agent systems (LangChain, LangGraph).
 - Integrated scalable backend systems via APIs (FastAPI, REST) and async workflows.
 - Designed automation pipelines and intelligent agents for real-world business use cases.
 - Worked with Generative AI systems, embeddings, and retrieval pipelines.
- 2026–Present **Freelance AI & Automation Solutions (B2B)**
- Developed and commercialized a real estate data scraping system (Python, Selenium), automating extraction pipelines for B2B lead generation.
 - Built SaaS-style automation tools and AI solutions for business process optimization using LLMs and n8n workflows.
- 2019–2025 **Judo Instructor**
- Black Belt (2nd Dan) and certified instructor; coached national-level athletes and led high-performance training programs.

Other Experience

- August 2024 **Travel for Different (Volunteering)**, Germany
Team Leader in an international volunteering project focused on sustainable tourism and coordination.
- Nov 2024 **Erasmus+ “Green Olives Europe”**, Montecilfone, Italy
Program focused on sustainability, entrepreneurship, and cross-cultural collaboration.
- Jul 2024 **Erasmus+ “Partnerships” Seminar**, Pirovac, Croatia
Program focused on networking and international project development.

Education

- 2022–2026 **B.Sc. in Business and Technology**, University of Santiago de Compostela
Honors Distinction in Machine Learning. **Bachelor’s Thesis:** *Linear Algebra for Portfolio Management*.
- Sep 2025–Jan 2026 **Erasmus Exchange Program**, IMC University of Applied Sciences, Krems
Coursework in Startup Management, Computer Engineering, and applied technology.
- Important Modules (selected)**
Big Data Technologies – 10/10, Information Systems for Finance (including R) – 10/10, Machine Learning (Honors Distinction) – 9.7/10, Technology for Intelligent Industrial Processes – 8.8/10, Information Security Management – 8/10, Data Mining and Business Intelligence – 7.5/10.
- Relevant Modules**
Programming, Statistics, Algebra, Calculus, Web and Application Development.
- GPA**
Overall: 7.4/10 **Technical:** 8.5/10

Awards & Recognition

USC Lugo Empreende	1st Prize – Entrepreneurship competition winner.
Terra Creative Jam	1st Place (International) – Award for rural opportunity innovation.
Hack Day USC-LOF	1st Place Winner – Sustainable festivals project.
Rural Youth of Europe	2nd Place (International) – Creative Jam finalist project in Malta.
Santander X Explorer	Local Winner & National Finalist – Entrepreneurship program recognition.
Grupo Hotusa	Regional Winner & National Finalist – Hospitality-tech innovation track.
ATLIC Program	EU Ambassador – Selected by the European Commission for innovation summits.
ATLIC Program	Blue Leader Recognition – Leadership distinction.

Technical Skills

AI & LLMs	Generative AI, LLM Systems, Retrieval-Augmented Generation (RAG), Multi-Agent Systems (LangChain, LangGraph), Prompt Engineering, OpenAI API, Embeddings, Vector Databases (Pinecone), Hugging Face.
Machine Learning	Supervised & Unsupervised Learning, Predictive Modeling, Feature Engineering, Data Preprocessing, Model Evaluation, Hyperparameter Tuning, PyTorch, TensorFlow.
Backend & APIs	FastAPI, REST APIs, SQL (PostgreSQL), Webhooks, Async integrations.
Data & Analytics	Python, Pandas, NumPy, Matplotlib, ETL, Data Visualization, and Statistical Analysis.
Automation	SaaS-style process automation, n8n, workflow design, and bot integrations.
Web & Product	JavaScript, React, Next.js, HTML, CSS, dashboard and internal tool development. Portfolio includes a yoga website project.
Dev Tools	Git, GitHub, Linux, Docker, API testing, deployment workflows.

Languages

English	B2 (Oxford) – Currently preparing C1 (DET).
German	Basic – Basic level from courses and classes during Erasmus in Austria.
Portuguese	Intermediate – Good comprehension and communication ability due to its similarity with Galician.
Spanish	Native – Bilingual.
Galician	Native – Bilingual.

Portfolio

alexcarnerooo.github.io/portfolio/

Focused on personal projects, especially Machine Learning applications.
